### Services

#### Our Core Services

##### Software Development

Custom software development as per customer requirements.

Cloud services (*Cloud application development*). Software solutions for startups. Enterprise software solutions.

##### System Integration

Enterprise application integration. Introduction of ERP systems. Consolidation of all data into one system.

##### IT Consulting

We organise effective IT infrastructure that enables quick interactions among business processes and quick collaboration among staff members in your organisation.

##### QA Testing

Functional testing of products being developed in order to eliminate errors and improve the stability of software operation.

##### Enterprise Portals

Intranet portals for promotion of collaboration across divisions of a company within one system.

##### Out-of-the-box solutions

For management of the enterprise resources

##### Lite. Small Business

A modern integrated ERP system by the developers of enterprise software solutions for medium-sized businesses which (*= the system*) will make your enterprise much more manageable, enhance its manoeuvrability, increase the effectiveness of decisions made, and improve monitoring of their implementation. Flexible payment models - both out-of-the-box solutions provided with implementation services and cloud solutions deployed on your servers with (*at*) a monthly fee per workstation.

For whom:

For small enterprises that wish to automate their operations.

For those who are unwilling to spend large sums of money immediately.

For companies that choose phased introduction.

##### Smart Enterprise

An integrated module ERP system for complex management and high-quality operational control over a company. Manage all resources in real time through the principles of planning, monitoring, and optimisation of business processes at all levels of your enterprise operation.

For whom:

For medium-sized enterprises that want to automate their business processes.

For those who are interested in a maximal capability set.

For those who are ready for a phased introduction and personalisation.
